Professional Summary

Junior Full Stack Python Developer with hands-on experience building scalable web applications using React, Django, and PostgreSQL. Skilled in developing RESTful APIs, creating responsive frontend interfaces, and managing relational databases. Currently working as a Full Stack Python Developer Intern at Bridgeon Solution LLP, contributing to real-world web application development.

Professional Experience

07/2025 – Present	Bridgeon Solution LLP Full Stack Python Developer Intern • Build full-stack web applications using React, Redux, Python, and Django. • Build responsive and reusable user interface components using React and Tailwind CSS. • Create RESTful APIs using Django REST Framework and implement secure authentication and authorization systems. • Manage relational databases using PostgreSQL. • Integrate frontend and backend systems through secure API communication. • Improve application performance by debugging issues and optimizing database queries. • Follow clean code practices and maintain scalable project architecture.
-------------------	---

Education

2023 – 2025 Kottukkara, Kerala	Higher Secondary Certificate Panakkad Pookkoya Thangal Memorial Higher Secondary School State Board — 84%
-----------------------------------	--

Technical Skills

Programming Python, JavaScript	Backend Django, Django REST Framework, API Development	Frontend React, Redux, HTML, CSS, Tailwind CSS
Databases PostgreSQL, SQLite	Tools & Deployment Git, GitHub, API Integration, MVC / MVT Architecture, Vercel, Render	

Languages

English	Malayalam
Hindi	

Projects

AI Interview Practice Platform Technologies: React, Python, Django, PostgreSQL • Built an AI-powered interview practice platform where users can register, log in, and participate in simulated interviews. • Integrated role-based access control for users and administrators. • Built an interview system that generates questions based on selected job roles. • Provided automated responses and feedback for candidate answers. • Introduced performance tracking with ranking, progress analysis, and interview history. • Created an admin dashboard to manage questions, users, and system analytics.
High-End Laptop E-Commerce Platform Technologies: React, Redux, Python, Django, PostgreSQL Engineered a full-stack e-commerce platform with product search, filters, wishlist, cart, and secure checkout functionality. Built responsive frontend interfaces using React and Tailwind CSS. Implemented backend services and REST APIs using Django. Structured PostgreSQL database schemas and optimized queries. Developed an admin panel for product management and order tracking.
Student Management System Technologies: Python, Django, SQLite Developed a backend system to manage student registration, profiles, and course allocation. Built RESTful APIs using Django for CRUD operations. Implemented authentication and role-based access control. Designed relational database structures using SQLite. Used Django ORM for efficient database operations.
